Checkpoint 1 First Peer Review 11-11-2024

The good quality is that I help out a lot when they have questions in the group. What to improve is that I sell myself to short on the learning outcome, like I have enough evidence to show but I don't think it enough.

Good at helping the rest with his experience to make it easier for us. Sells himself short, need to be more confident in his abilities

He is a valuable member of our team, always willing to provide feedback and offer clear explanations. Whenever I encounter challenges, he takes the time to help me understand the work

Tony is very helpful to other members, taking the time to explain things. However, he could improve by not selling himself short and recognizing his own potential to do even better

Good teacher. Likes to help other. He should be more confident when grading himself
